

Undergraduate Student Faculty Mentor Selection Form

*Do you want to conduct undergraduate research?
Do you have visions of Nobel Prize Awards in your future?
Would you like to complete an honors research thesis?*

If you answered 'yes' to two out of three of these questions,
then you should follow the steps below!

1. Meet with at least 3 research faculty.

To assist you in making an informed decision, you should meet with at least three research faculty in the department to hear about the ongoing research activities in their lab. You may begin meeting at any time and you are encouraged to meet with them early in the academic year. The easiest way to contact most faculty is by e-mail. After meeting with the research faculty, you should get the faculty member to sign your form.

Faculty Member

Signature

Prof. Sharon Burgmayer

Prof. Michelle Franci

Prof. Jonas Goldsmith

Prof. Bill Malachowski

Prof. Frank Mallory

Prof. Susan White

2. Rank your top 3 faculty mentor choices by Feb. 15.

Since lab space is limited, we can't guarantee that you will get your top choice, but we will do our best to match you with a faculty mentor whose research interests you the most.

Faculty Mentor Choices

1. _____

2. _____

3. _____

3. Return completed form to Prof. Lukacs.

When you have completed your visits and after you have ranked your prospective faculty mentors please bring the form to Prof. Lukacs, the undergraduate chemistry advisor, in PSB 184.

Student: _____

Faculty Mentor: _____
